## Work experience

10.2009 – SIA  
Feedlline, Riga

Position: Project manager, Software Developer  
Role

Since October of 2009 year I work in SIA Feedlline.. At the moment I am responsible for small team of 4 developers. Step by step we have developed 3 projects. Feedlline - AI based bot traffic recognizing system, Boarmachine.com (FOREX game machine), JForex project – Commercial version of trading system for Dukascopy Bank. My daily duties are to maintain and manage existing projects. I organized working process, provided bug tracking system and CVS system. But most time of that took development.

Most significant project boarmachine.com. The product has commercial product status.

Technologies

Apache, PHP, MySQL (Logic of financial server was developed using MySQL stored procedures), JavaScript, HTML5, Java (Swing, JForex).

7.2004 – 10.2009  
SIA Strongware, Riga

Position: Project manager, Software Developer  
Role

I had team of 10-15 developers. We developed innovative web projects like:Albetty – Web Docflow system. Commercial version.

Funnyyyy.com – Advanced social network. Commercial version. Project is closed.

ColumbOS – WebOS. Prototype. The system had web integrated VNC system. Project is closed.

Columb.net – Filesharing system. Commercial version. Project is closed.

Main task – new product's prototype or commercial versions development.

Technologies.

Apache, PHP, MySQL, Postgresql, MSSQL, C++ architecture on the server side and high quality OOP Javascript code for client actions.
